Presently, the college offers fourteen UG programmes and nine PG programmes.

About the Department

The department offers an undergraduate programme in Computer Applications and a post programme in Computer Science. It aims at imparting quality education in Computer science through a post-graduate programme. It has the largest student intake of all the departments of the college and offers an environment conducive for postgraduate students pursuing research projects in a variety of advanced areas of computer science, engineering and information technology. The department emphasises creating technologically superior and ethically stronger global manpower.

Objective

The main objective of this conference is to discover and discuss different machine learning models and Big data systems. It provides a national forum for the presentation of original research results, as well as exchanges and dissemination of innovative, practical development experience in the area. The conference covers all aspects of machine learning including algorithms, software and systems, social networks and applications. Through the use of computational intelligence, analytics can improve strategic intelligence assessments by capitalizing on the scientific and tradecraft merit of computational simulation.
